

## DC REDP WILL HELP YOU:

- **Decrease utility bills**
- **Save money over time**
- **Protect the environment**
- **Increase local energy security**
- **Reduce your consumption of gases that contribute to global warming**

For more information about DC REDP, call the District Department of the Environment's Energy Hotline at: (202) 673-6750 between 8:30 am – 4:30 pm Monday through Friday. You may also visit the DDOE website at: [ddoe.dc.gov](http://ddoe.dc.gov)

GOVERNMENT OF THE  
DISTRICT OF COLUMBIA  
Adrian M. Fenty, Mayor

## WHAT IS DC REDP?

The District of Columbia Renewable Energy Demonstration Project (REDP) provides qualified applicants up to 50% of the costs associated with installing a mechanism to produce electricity using a renewable source of fuel. Eligible projects include District residences, hospitals, and commercial or institutional buildings.

Projects may include, but are not limited to, installing solar photovoltaic panels, fuel cells, biomass-fired CHP systems, and small wind turbines where suitable.

The REDP is designed to increase the awareness and usage of renewable electricity generation technologies. In the first round of DC REDP, the average amount funded per project was approximately \$15,000.

Awarded funding must be used to construct, purchase, support, or install equipment that will produce electricity from a renewable fuel source.

*Non-eligible entities include DC Government, Federal Government, Electricity suppliers and Electricity companies.*

## ELIGIBLE PROJECTS MUST:

- Exist in the District of Columbia
- Consist of a new installation
- Use a renewable resource to produce electricity that can be fed back into the utility grid
- Contain a detailed budget and work plan
- Describe the positive or negative effects on the ecological and physical environment. For example, emissions, structural changes, runoff, etc.

*Grants approved through this program can be used in conjunction with Federal Tax Credits aimed at increasing renewable energy generation and energy conservation.*

## HOW TO APPLY

### Step 1:

Call the District Department of the Environment's Energy Hotline at: (202) 673-6750, or visit the web: [ddoe.dc.gov](http://ddoe.dc.gov) to download an application packet.

### Step 2:

Complete the project proposal and mail or deliver it to The District Department of the Environment's Sustainable Solutions Division: 2000 14th Street, NW, Suite 300, Washington, DC 20009.

Proposals can also be faxed to 202-673-6725

### Step 3:

All project proposals will be evaluated and ranked.

### Step 4:

Award recipients must complete the project within **one year**. Additionally, project data reports must be submitted for two years after the completion of the project.
